# usecases

One example of a person in Nigeria who could make a difference but lacks funding is Nnimmo Bassey, an environmental activist and author.

Another Example is Olumide Idowu the co-founder of a company called GreenGo.

# PROBLEMS/STATISTICS

## Insufficient Green Energy Solutions

Nigeria only gets around 2% of electricity from renewable sources, and the vast majority of the population does not have access to electricity at all.

The country is facing a number of environment challenges, including deforestation, air pollution and water pollution. This environmental challenges are largely caused by over-reliance on fossil fuels.

## Lack of Funding for Green Energy Solutions

Nigeria in 2015 only spent 0.1% of its GDP on renewable energy which is significantly less than what it's meant to be.

There is lack of private sector investment in green energy, as many companies startup but later lack fundings to continue.

# SOLUTION

Eco-Funds is a groundbreaking green energy fundraising platform committed to ushering in a sustainable future. By connecting passionate environmentalists, investors, and eco-entrepreneurs, Eco-Funds offers a dynamic space to fund innovative renewable energy projects and initiatives. The benefits are immense: empowering clean energy innovation, reducing carbon footprints, creating job opportunities, and driving economic growth. With Eco-Funds, individuals and organizations alike have the power to be part of the green energy revolution, making a positive impact on our planet and ensuring a brighter, cleaner tomorrow. Join us in driving change, one eco-friendly investment at a time.

# OUR MISSION

Our mission is to empower individuals and organizations to be catalysts for positive change in the world of green energy. We are committed to fostering a sustainable future by connecting passionate supporters with innovative green energy projects in need of funding.

# OUR VISION

Our vision at EcoFund is to become the global hub for transformative green energy solutions. We envision a world where clean, sustainable energy sources power our future, and EcoFund plays a pivotal role in making this vision a reality. We strive to be a platform that inspires, connects, and fuels innovation in the green energy sector. By 2030, we aim to have supported and catalyzed the development of a multitude of green energy projects, reducing carbon emissions, fostering energy independence, and creating a more sustainable, prosperous, and environmentally friendly planet for all.
